### Fund update

The investment objective of the Fund is to achieve real long-term growth in capital values and a rising income from a portfolio managed within a clear risk control framework. The portfolio has a bias towards real assets, predominantly global equities but also including property and infrastructure. Stocks are selected on a ‘bottom-up’ basis focused on businesses’ fundamental characteristics including consideration of environmental, social and governance risks. We favour companies with the potential to grow more predictably than the general economy, resulting in relatively high weightings to sectors such as healthcare, consumer expenditure and technology. Activity in the latest period included a modest reduction in equity market exposure with the proceeds reinvested in property and alternatives.
