

KEY INVESTOR INFORMATION DOCUMENT

CCLA

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

CCLA Better World Global Equity Fund Class I Shares - Income ISIN:GB00BPP3BZ07 A sub-fund of CCLA Investment Funds ICVC (the “Company”). An Open Ended Investment Company (OEIC) that is managed by CCLA Investment Management Limited the Authorised Corporate Director (“ACD”).

Investment Objective and Policy

The Fund aims to provide a total return (the combination of capital growth and income) over the long-term (defined as any rolling period of 5 years) and is managed in line with CCLA’s approach to investing for a better world.

The Fund is a diversified portfolio of shares of companies (also known as equities) from around the world. The Fund typically invests at least 80% of its assets in equities with significant allocations to developed markets (eg. United States, United Kingdom and Germany) but may also invest in emerging markets (eg. India, Mexico and Brazil). The Fund is actively managed which means the Investment Manager uses their discretion to pick investments to seek to achieve the investment objective.

The Fund may also invest up to 20% in a range of other investments including fixed/floating interest securities (also known as bonds) issued by governments and their agencies and by companies and other issuing bodies, infrastructure related assets (indirectly), money-market instruments, cash. The Fund’s typical exposure to emerging markets will be 5% but may be up to 20%.

Exposure to these assets may be via direct holdings or indirectly through investment in other funds (including those managed and operated by the ACD and its Associates). Such funds may include exchange traded funds, closed-ended investment companies (including UK investment trusts) and open-ended funds.

Dependent on market conditions (such as political unrest, economic instability, war, the failure of large financial institutions or the closure of certain markets) and the Investment Manager’s view of the market, exposure to shares may be lower than 80% for limited periods.

The investment manager takes a long-term view and focuses on constructing a portfolio to offset risks. The Fund will not have a

concentrated portfolio or be restricted by sector or industry. The Fund may only use derivatives (financial instruments whose value is linked to the price of another asset) to reduce risk or cost and/or to generate extra income or growth.

Investing for a Better World: The Fund is managed in line with CCLA’s approach to investing for a better world. This includes:

- **Acting as an agent for ‘change’** – because investment markets can only ever be as healthy as the environment and communities that support them.
- **Assessing companies’ environmental, social and governance criteria** – because the Investment Manager believes a combination of legislation, regulation and changing societal preference will impact negatively on unsustainable business models.
- **Investing in a way that is aligned with our clients.**
- **Implementation of the Better World Policy** – as the Investment Manager will establish a 6 month divestment window for the asset to be sold should a portfolio holding cease to comply with the Better World Policy.

Full details of CCLA’s approach to investing for a better world can be found in the Fund’s Prospectus.

Additional Information:

This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy and sell shares in the Fund on each business day.

In addition to the charges set out in the charges section, the fund will incur portfolio transaction costs which are paid from the assets of the fund.

The Fund aims to distribute available income every 3 months.

Risk indicator

The Fund is rated 5 because its simulated value has shown medium to high rises and falls in value historically.

The risk and reward rating is based on historical data and may not be a reliable indicator of future risks or rewards. The risk category shown is not guaranteed and may shift over time. The lowest category does not mean risk free.

The risk and reward indicator does not take account of the following risks of investing in the Fund:

Market Fluctuation Risk – The value of investments and the income derived from them may fall as well as rise. Unitholders may not get back the amount originally invested and may lose money.

Credit Risk – The Fund invests directly or indirectly in bonds which are issued by companies or governments. If these companies or governments experience financial difficulty, they may be unable to pay back some or all of the interest, original investment or other payments that they owe. If this happens, the value of the Fund may fall. Investment returns on bonds are sensitive to trends in interest rate movements. Such changes will affect the value of your investment.

Counterparty Risk – The Fund could lose money if an entity with which it does business becomes unwilling or is unable to meet its obligations to the Fund.

Derivative Risk – Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.

Liquidity risk – In exceptional circumstances where assets cannot be fairly valued or have to be sold at a large discount to raise cash, we, with the permission of the Fund’s depositary, may temporarily suspend the fund in the best interest of all investors.

Operational Risk – Operational risks arising from errors in transactions, valuation, accounting, and financial reporting, among other things, may also affect the value of your investments.

Emerging Market Risk – Investing in emerging markets involves a greater risk of loss due to greater political, tax, economic, foreign exchange, liquidity and regulatory risks, among other factors. There may be difficulties in buying, selling, safekeeping or valuing investments in such countries

Currency Exchange Rates Risk – The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment.

Please refer to the Fund’s Prospectus for full details on the risk factors for this Fund.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The ongoing charge is an estimate of the charges because the fund was launched less than 12 months ago on 8 April 2022. These figures may vary from year to year. It excludes portfolio transaction costs.

A dilution adjustment, which will change the prices for buying or selling shares in the fund with the aim of mitigating the effects of dealing and other charges the fund incurs, may be made on a purchase or sale of units in the Fund.

Please refer to the Fund's Prospectus for full details on the charges for this Fund.
