

CCLA Cautious Multi-Asset Fund

Investment objective

The fund aims to provide a total return (income plus capital growth) after costs, of inflation (as measured by the UK consumer prices index) plus 2% per year over the long term (defined as five years). Being 'Cautious', the fund will invest no more than 50% by value in company shares (equities).

Investment philosophy

The fund invests in a broad range of assets. As an actively managed multi-asset fund, the amount it invests in different asset classes will vary over time depending on economic/market conditions and our expectations of future returns and volatility. Where we invest in companies, we seek high-quality companies believing those that can grow returns consistently at valuations that are attractive, should lead to outperformance over the long term. We look for companies which in our opinion:

- demonstrate an enduring competitive advantage, measured by their cash flow return on investment and a strong track record of shareholder value creation
- benefit from clear long-term growth trends
- benefit from superior financial strength, with a strong balance sheet
- are trading at valuations that are attractive.

Sustainability approach

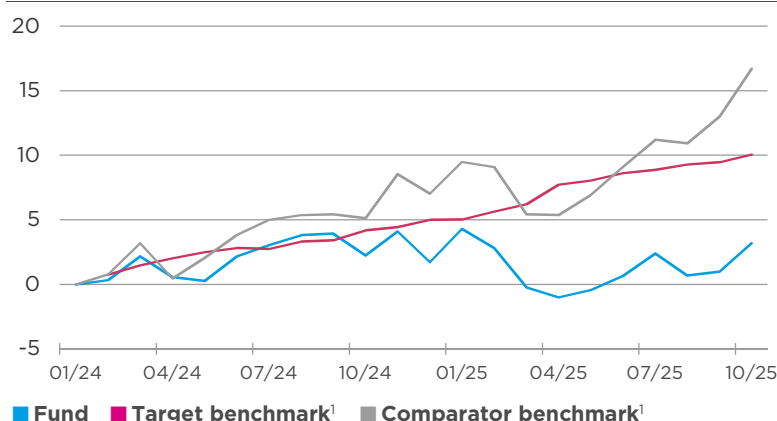

We believe that the primary role of sustainable investment is to drive positive change and this is best achieved by pushing companies to do more to address the major challenges facing us today.

We aim to manage our clients' investments in a way that aligns with their values and to do this we consider environmental, social and governance (ESG) factors in our listed equity investment process and go beyond the boundaries of traditional investor engagement to drive change. The FCA has introduced sustainable investment labels to help investors find products that have a specific sustainability goal. This product does not have a UK sustainable investment label because it does not have a sustainability goal.

Read our summary of [SDR, the investment labels and our overall approach](#). Fund-level information can be found [here](#).

Risk and reward profile

The risk and reward indicator is based on a simulation of the volatility of the fund's value (using historical data) and it may change in the future. This fund is in category 4 because its simulated value has shown moderate levels of volatility historically.

For more information please refer to the key investor information document (KIID).

² Totals may not sum due to rounding.

³ Infrastructure: assets that facilitate the functioning of society with the potential for steady cash flows (energy-related & social).

⁴ Contractual: assets generating contracted cashflows over a specific period and typically secured against assets.

⁵ The ACD may waive this minimum level at its discretion.

⁶ The ongoing charges figure (OCF) includes the annual management charge (AMC) and other costs and expenses of operating and administering the fund such as depositary, custody, audit and regulatory fees. Where relevant, the OCF also includes synthetic charges. Synthetic charges are the effect that costs suffered as a result of investment in relevant underlying funds or similar investments have on the fund. The OCF does not include portfolio transaction costs. Further information on costs and expenses is available on our website.

⁷ The AMC is deducted from capital. This has the effect of increasing the distributions for the year and restricting the fund's capital growth to an equivalent extent.

⁸ The historic yield reflects distributions declared over the past twelve months as a percentage of the share price as at 31 October 2025. Investors may be subject to tax on their distributions.

Sustainability update

We assess the environmental, social and governance criteria of companies because we believe that a combination of legislation, regulation and changing societal preferences will impact negatively on the most unsustainable business models.

Acting as an agent for change

We believe that the best way to change company activities for the better is to be an active owner and to push for proactive public policy.

Example: Sustainable Development Goal 3

Ensure healthy lives and promote well-being for all at all ages.

Mental ill-health in the workplace costs businesses billions due to a combination of absenteeism, presenteeism and staff turnover. Deloitte estimates an average cost of \$2,600 per employee each year. Novo Nordisk is one of 220 companies assessed and ranked yearly in the CCLA Corporate Mental Health Benchmark. We have been engaging with the company on this topic since 2022.

Since engagement began, the company has clarified management responsibility for mental health, disclosed health and safety certification and improved wellbeing performance data. The 2025 global mental health benchmark was published in October. It showed that Novo Nordisk has increased its score by 44 percentage in 2022-25, resulting in an upgrade from Tier 5 at the outset to Tier 3 and making it the third most improved company in the global benchmark since its inception.

Climate-related risk disclosures for listed equities

Data coverage: The carbon and climate metrics set out below ONLY cover the fund’s holdings in listed equity investments, which represent **36.9%** of the value of the fund. Therefore, the figures stated do not represent the fund’s total carbon footprint/climate related impact for these metrics and are not comparable with other funds. Lower data coverage results in reduced reliability for these metrics.

Carbon footprint⁹

■ Fund
■ MSCI World Index

Source: MSCI.

Climate value at risk (%)¹⁰

Implied temperature rise (°C)¹¹

⁹ Measures the carbon efficiency of a portfolio, defined as the ratio of carbon emissions for which an investor is responsible to the sales for which an investor has a claim by their equity ownership. This measure allows investors to know how many emissions units per dollar of sales are generated from their investment. Carbon footprint data relates to Scope 1 and Scope 2 emissions only.

¹⁰ Is a forward-looking measure of risk which estimates the amount of loss the portfolio may experience in future due to the impacts of climate change. The model used to calculate this measure is the REMIND 1.5°C NGFS Orderly transition scenario with an average physical risk scenario model. For further information on the model used, please visit www.ngfs.net/ngfs-scenarios-portal.

¹¹ Implied Temperature Rise (ITR) provides a portfolio level number in degrees of Celsius demonstrating how aligned the companies in the portfolio are to global temperature goals. It is a forward-looking metric that shows how a company aligns with the ambitions of the Paris Agreement – which is to keep a global temperature rise this century well below 2°C above pre-industrial levels and to pursue efforts to limit the temperature increase even further to 1.5°C.

How do I assess the performance of the fund?

Investors can assess the fund's performance against the fund's target benchmark. The fund's performance can also be assessed against the fund's comparator benchmark. The comparator benchmark has been designed to broadly reflect the risk/return profile of the fund and its underlying assets portfolio over the long term.

Important information

Source for data is CCLA unless otherwise stated.

This document is a financial promotion and is for information only. It does not provide financial, investment or other professional advice. To make sure you understand whether our product is suitable for you, please read the key investor information document and prospectus and consider the risk factors identified in those documents. The fund may not be appropriate for investors who wish to withdraw their investment within five years.

CCLA strongly recommend you get independent professional advice before investing. Past performance is not a reliable indicator of future results. The value of investments and the income from them may fall as well as rise. You may not get back the amount you originally invested and may lose money. Any forward-looking statements are based on our current opinions, expectations and projections. We may not update or amend these. Actual results could be significantly different than expected.

Issued by CCLA Investment Management Limited (registered in England and Wales, number 2183088, at One Angel Lane, London EC4R 3AB) who is authorised and regulated by the Financial Conduct Authority.

For information about how we collect and use your personal information please see our privacy notice, which is available at www.ccla.co.uk/privacy-notice.
