

COIF Charities Ethical Investment Fund

Fund Fact Sheet – 30 September 2018

Investment objective

The Fund aims to provide a long-term total return comprising growth in capital and income.

Investment policy

The portfolio is an actively managed, diversified portfolio of assets designed to help protect both present and future beneficiaries from the effects of inflation. It will mainly invest in equities, but will also include property, bonds and other asset classes.

The Fund has a wide range of ethical restrictions and is advised by an ethical advisory group that assists in the development of the Fund's client-driven ethical investment policy.

Suitability

The Fund is suitable for all of a charity's long-term funds where the charity is looking for a good level of distributions, long-term protection from inflation and a wide range of ethical restrictions.

Who can invest?

Any charitable organisation defined within the meaning of the Charities Act 1993 can invest in the Fund, providing that its powers permit.

Ethical & responsible investment policy

We confirm that the Fund is managed in accordance with the policy set by the Board and CCLA's response to the UK Stewardship Code. Our voting record is available at www.ccla.co.uk

Fund update

The prime objective of the Fund is to protect and grow the real value of the capital invested, and the income it provides. We believe that these targets are most likely to be achieved with a strategy with a strong bias to real assets, such as global equities and property.

Equity selection reflects the expected returns of the individual companies, rather than any pre-determined allocation to any region or sector. At present, there is a high weighting to overseas assets and sector biases to technology, materials and parts of the consumer sectors. The exposure to utilities and to energy is below that of market indices. Recent activity has reflected a slightly more defensive stance. We have taken profits on some highly rated and strong performing stocks, particularly in the I.T sector. The holding in US government bonds, introduced in the second quarter, has been expanded by a purchase of U.S. government-inflation protected securities.
