

COIF Charities Ethical Investment Fund

Fund Fact Sheet – 31 December 2018

Investment objective

The Fund aims to provide a long-term total return comprising growth in capital and income.

Investment policy

The portfolio is an actively managed, diversified portfolio of assets designed to help protect both present and future beneficiaries from the effects of inflation. It will mainly invest in equities, but will also include property, bonds and other asset classes.

The Fund has a wide range of ethical restrictions and is advised by an ethical advisory group that assists in the development of the Fund's client-driven ethical investment policy.

Suitability

The Fund is suitable for all of a charity's long-term funds where the charity is looking for a good level of distributions, long-term protection from inflation and a wide range of ethical restrictions.

Who can invest?

Any charitable organisation defined within the meaning of the Charities Act 1993 can invest in the Fund, providing that its powers permit.

Ethical & responsible investment policy

We confirm that the Fund is managed in accordance with the policy set by the Board and CCLA's response to the UK Stewardship Code. Our voting record is available at www.ccla.co.uk

Fund update

The prime objective of the Fund is to protect and grow the real value of the capital invested and the income it provides. We believe, that over the long term, these are most likely to be achieved by a strategy which is biased towards real assets, including equities and property. Equity selection is made on a 'bottom-up' basis, selecting companies on their merits rather than to follow a predetermined allocation to a sector or region. At present, this results in a high weighting to non-UK assets. During the third quarter, we adopted a more defensive portfolio structure, reducing the exposure to cyclical sectors and trimming the weighing to companies on expensive and extended ratings. This approach was maintained in the final period with further profit taking in sectors such as technology and industrials and increased weightings in healthcare and consumer staples. One outcome of this activity is that the exposure to the US market is lower and cash holdings increased.
