Fund update

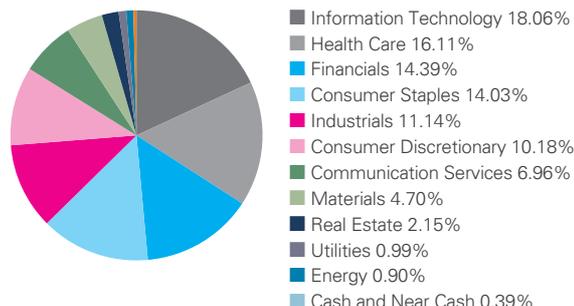

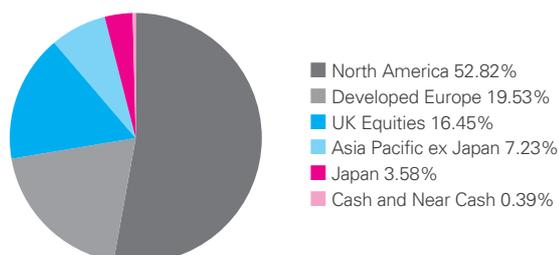

The portfolio has no pre-set allocation to any sector or geographical region. Instead companies are selected on their merits and fit to expected investment conditions. In recent times, this has resulted in a relatively high exposure to companies in the health, I.T. and industrials sectors, balanced by low weightings in areas such as utilities and energy. In the latter part of 2018, the Fund reduced portfolio risk by reducing the exposure to cyclical sectors and highly rated companies; this stance has been maintained.

Since January 2018, the Fund has employed a total return approach to income distributions, by which income payments can be sourced from both conventional income and sustainable capital gains.
