Fund update

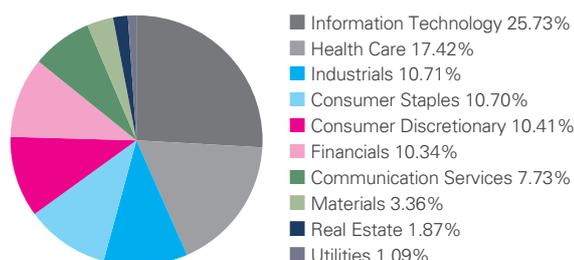

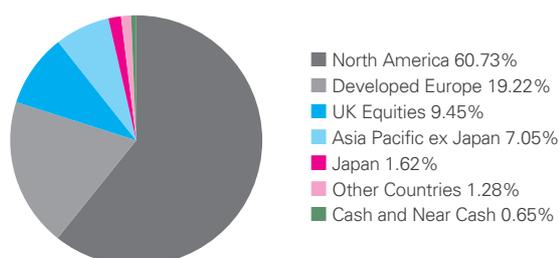

The portfolio is built on a ‘bottom-up’ approach, that is by selecting companies on their merits rather than by conforming to any predetermined allocation to any sector or region. We look for companies that have strong cash flows and are well positioned in growing sectors where expansion is not dependent on the underlying trends in economic activity. At the current time this has resulted in relatively high weightings to parts of the technology and communications industries, to health and to some consumer related areas. The same criteria also result in low weightings to mainstream banking or energy where growth prospects are far from clear.

Past distributions

The accounting period for the Fund changed in 2015 and is now aligned with calendar quarters.
