Fund update

The portfolio does not have pre-set allocations to any region or sector, rather it is built on a ‘bottom-up’ basis, selecting individual companies with strong growth potential and which can be bought on attractive valuations. This approach has resulted in relatively high levels of exposure to some of the consumer related sectors, to technology and to the health sector. There are low weightings to energy and to utilities. Over the quarter, the cash holding built up earlier in the year was substantially reinvested, reflecting an expectation that markets will progress in the period ahead.

Past distributions

The accounting period for the Fund changed in 2015 and is now aligned with calendar quarters.
