Fund update

The objective of the Fund is to provide real long-term growth in capital and income from a portfolio managed within a clear risk control framework. To achieve this the Fund has a bias to real assets such as global equities, property and infrastructure and currently has no holdings in conventional fixed income assets, which are seen as a poor match to long term needs. The portfolio is built to be a 'bottom-up' process which selects individual stocks on their merits rather than to fit a predetermined allocation to any sector or region. We favour companies with strong growth prospects and this has resulted in a relatively high weighting to companies in the technology and health industries, in consumer facing companies and parts of the financial sectors.
