

KEY INVESTOR INFORMATION

The Public Sector Deposit Fund (“PSDF”) is a sub-fund of the CCLA Public Sector Investment Fund (“Fund”), an OEIC that is managed by CCLA Investment Management Limited (the “ACD”)

This document provides you with key investor information about the PSDF. It is based on a representative share class (Share Class 4). It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in the PSDF. You are advised to read it so you can make an informed decision about whether to invest.

OBJECTIVE AND INVESTMENT POLICY

The investment objective of the PSDF is to maximise the current income consistent with the preservation of principal and liquidity by investing in a diversified portfolio of high quality sterling denominated deposits and instruments. The primary objective is to maintain the net asset value of the PSDF at par (net of earnings).

The PSDF will only invest in sterling denominated investments and deposits. The principal investments will comprise certificates of deposit, call accounts, and term deposits with banks and building societies. The PSDF may also invest in other securities such as commercial paper, floating rate notes and bonds which may be issued or guaranteed as to principal or interest by sovereign governments and their agencies, supranational entities, corporations and financial institutions. All investments at the time of purchase will be considered by the ACD to be of high quality, meaning that the ACD has performed its own documented assessment of the credit quality of money market instruments taking into account ratings awarded by a credit rating agency registered and supervised by the European Securities and Markets Authority.

The PSDF is a “qualifying money market fund” which is classed as a “low volatility net asset value” (LVNAV) short-term money market fund under the Money Market Funds Regulation and, as such, is subject to the investment and borrowing powers and restrictions applicable to such funds. The weighted average maturity of the PSDF’s investments will not exceed 60 days. The weighted average life of the PSDF’s investments will not exceed 120 days.

The PSDF will not invest in derivatives, collective investment schemes, eligible securitisations or asset-backed commercial paper (ABCPs). Nor will it invest in assets which are not eligible assets for investment by a money market fund. Further, the PSDF will not undertake short-selling of money market instruments, securitisations, ABCPs or units or shares of other money market funds. The PSDF will not enter into repurchase agreements, securities lending agreements or securities borrowing agreements. Finally, the PSDF will not borrow cash.

Shareholders may typically redeem shares on demand on any dealing day (as set out in the Prospectus).

RISK AND REWARD PROFILE

The risk and reward rating is based on historical data and may not be a reliable indicator of future risks or rewards.

A low risk fund is not a risk-free investment. Low risk funds target investments with low volatility and aim to maintain a constant net asset value at par. This means the risk of losing your money is small, but the chance of making gains is also limited. **Shareholders and potential shareholders should note that, in certain circumstances, the PSDF will not accept redemptions or subscriptions at a constant NAV per share.**

The PSDF is AAmmf rated by Fitch Ratings. **Shareholders and potential shareholders should be aware that this rating was solicited and financed by the Fund.**

The risk and reward rating does not cover the following additional risks:

- **The value of the PSDF’s shares is not guaranteed, and buying shares is not the same as making a deposit with a bank or other deposit taking body.**
- Investment is at your own risk. The PSDF has no capital guarantees and the value of your investment may go up or down. Any loss of principal is to be borne by the investor.
- The PSDF aims to maintain a constant NAV, however there is no guarantee that a stable NAV will be maintained.
- The PSDF does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per share.
- The value of the PSDF may be affected by movements in interest rates and the creditworthiness of the issuers of the debt instruments the PSDF invests in.

CHARGES

The charges you pay are used to pay the costs of running the PSDF, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The charges shown in the table opposite are representative figures, based on PSDF Class 4 Shares. In some cases you might pay more. The ongoing charge is based on expenses for the twelve-month period ending 31 March 2018. These figures may vary from year to year.

You can find out more details about the PSDF's charges by looking at the Fund's Prospectus.
